

Impulse Audio Lab is an audio company based in the heart of Munich. We are an interdisciplinary team of experts in interactive sound design and audio software development, working on fascinating and pioneering projects focused on sound.

# Software Development Intern (f/m/x)

## for innovative audio projects

We are looking for a Software Development Intern to join our team in developing and implementing audio software for applications ranging from audio production software to sound generators for electric vehicles.

At Impulse Audio Lab interns are part of the team and actively involved in projects. Let us empower you to push boundaries.

### These could be your responsibilities:

- Developing innovative audio software applications (programming)
- Documenting and testing new software applications
- Assessing new application ideas
- Researching new audio algorithms and products
- Recording, audio measurements and analysis tasks

### This should be you:

- You are working on a degree in a field related to programming or audio technology
- You have initial programming experiences in C, C++ or Python
- You are a team player and are also comfortable taking responsibility for your own tasks
- You have practical experience with music, such as playing an instrument or electronic music production

### This is what you could get:

- A paid internship where you will work with and learn from an enthusiastic team with diverse disciplines around audio and music who is keen on sharing their knowledge with you
- A wide field of development projects and tasks related to audio where you can bring in your ideas
- A great working environment and centrally located office space with a fantastic rooftop (BBQs included)
- Premium grade espresso

>> We realize we work in a masculine industry where significant parts of our society are underrepresented. We actively encourage applications from all parts of society, including women, ethnic minorities and LGBT+ applicants. At our company you will find an environment of respect. We strive to make our industry more inclusive. <<

We are looking forward to hearing from you!
